This is a confidential report intended for use by, or under the guidance of, a trained professional or psychologist. For a full understanding of the analysis other relevant data such as ability, aptitudes, motivation, interests and work experience need to be considered.

Abstract Reasoning

The Abstract Reasoning Test assesses the ability to understand complex concepts and assimilate new information beyond previous experience. The test consists of items which require the recognition of patterns and similarities between shapes and figures. As a measure of reasoning it is independent of attainment and can be used to provide an indication of intellectual potential. Assessing the ability to quickly understand and assimilate new information it is likely to predict how responsive to training the person will be.

Fred's score on the Abstract Reasoning Test indicates that his performance is noticeably below average when compared to the reference group. As a consequence he may have some difficulty fully appreciating new and abstract concepts which are outside of his previous experience. He is likely to require a somewhat more structured approach to learning than the average expected of in order to ensure that he fully understands the intricacies of highly complex theoretical arguments.
